. . as a plug-in to other Microsoft Office applications such as Word and Excel and as a standalone application. Process Simulator provides a free 30-day trial. Pricing is based on the number of users. Requirements Visio for Mac: Minimum version 2.2.0 (32 bit) or higher, full license required (32 bit) or higher, full license required Visio Professional: Minimum version 2.5.0 (32 bit) or higher, full license required (32 bit) or higher, full license required Visio Pro: Minimum version 2.6.0 (32 bit) or higher, full license required (32 bit) or higher, full license required Visio Standard: Minimum version 2.5.0 (32 bit) or higher, full license required (32 bit) or higher, full license required Visio Basic: Minimum version 2.3.0 (32 bit) or higher, full license required Minimum version 2.5.0 (32 bit) or higher, full license required Microsoft Office 2007: Minimum version 2003 or higher (32 bit) or higher See also Comparison of Visio alternatives References External links Visio Downloads PCHelp download site Visio for Mac official site Category:Business software Category:Office suites Category:Microsoft Office Category:Simulation softwareQ: How to get the value of a column in a joined table based on an index from another column in the same table I am trying to do a mysql query to get the score of the winners of each table based on the order of the entry. This is what I have so far. \$sql = "SELECT teams.team_code, scores.score FROM scores INNER JOIN teams ON scores.game_id =

teams.id_game ORDER BY scores.game_id ASC"; This is what I have so far. I want to be able to get the value of score based on the order of the table game_id. A: How about this? SELECT t1.team_code, scores.score FROM scores INNER JOIN teams t1 ON scores.game_id = t1.id_game 82157476af
